

INTRA-EU TRADE STATISTICS

INTRASTAT – 2024 Edition USER'S GUIDE This manual is a support document for filling in the INTRASTAT questionnaires. It includes general information about the INTRASTAT system and detailed guidelines to help you fill in the questionnaires. This Manual is the most recent edition of the Portuguese version, which has been updated and several examples and explanations have been added, taking into account users' suggestions. All suggestions for improving this document are welcome, as a good manual can only be compiled in close cooperation with its users.

Prepared by:

Economic Statistics Department/ External Economy Statistics Unit And Data Collection and Management Department / Administrative and Business Data Unit

III.1.13. PARTNER ID (only on Intra-Union exports (dispatches))______24

I. INTRODUCTION

NEW FEATURES IN 2024

As a result of changes in the legislation, **the following aspects stand out in the response to INTRASTAT**:

- In order to reduce the statistical burden on respondents, the assimilation threshold (Mainland/Azores) was set at €600 000 for both Intra-Union Imports (Arrivals) and Intra-Union Exports (Dispatches).
- > The [Partner ID], in Intra-EU exports (dispatches), should correspond to the entity that actually received the goods (physical movement) after dispatch from Portugal.

In very exceptional situations, when it is not at all possible to make this identification, it may be indicated as follows:

1st The Partner ID number corresponding to the entity to whom the goods were invoiced;
2nd A fictitious Partner ID number, indicating the invoicing country of the goods, followed, twelve times, by the number 9 (e.g. "FR9999999999999999999);

3rd If neither of the two previous options are possible, fill in the Partner ID field with "QV99999999999999999999999".

- The table of regions (optional variable) has changed following the adoption of the new configuration of the Nomenclature of Territorial Units for statistics, in this case at NUTS 3 level (see ANNEXII).
 - The quality and relevance of the statistics on International Trade in Goods depend crucially on the accuracy in the completion of INTRASTAT and compliance with the response deadlines.
 - It is extremely important that Statistics Portugal has updated information on each Provider of Statistical Information (PSI). Therefore, whenever there is any change (namely of the enterprise name, address or contacts), it should be communicated to Statistics Portugal through an update on WebInq or by email, as soon as possible.

With the introduction of the European Single Market on the 1st of January 1993, most customs formalities and operations linked with the transaction of goods between Member States of the European Union (EU) were suppressed. The data collected in Intrastat are a fundamental source of information for compiling National Accounts, the Balance of Payments and calculating the Gross Domestic Product (GDP), one of the most important indicators of a country's economic performance, essential for Governments, agencies of the EU and other international bodies to define the necessary public policy measures, and to support companies' investment decisions.

Data analysis can be useful for a variety of purposes, with examples being the assessment of the concentration of transactions of a certain product in a given market/EU Member State and the weight of a certain product in intra-community trade transactions.

INTRASTAT is the system for collecting statistical information on transactions of goods between EU Member States (imports and exports), a mandatory response for all operators with transactions that reach the assimilation thresholds set in the year of the operation (<u>refer to II.6</u>).

Each month, the information released is sent to Eurostat (the European Union's statistical office) for publication, in accordance with a strict timetable defined by EU regulation, and it is essential that the information is sent to Statistics Portugal on time: by the 15th of the month following the month in which the data was collected.

Statistics Portugal (INE, I.P.) provides free electronic forms for data submission (<u>https://webinq.ine.pt</u>).

 WEBINQ – Provides access to Surveys on the WEB, with the possibility to answer the INTRASTAT System through an online electronic form (it is also possible to obtain all the information regarding this statistical operation).

This guide is valid for the year 2024 and includes a set of procedures necessary for the proper provision of statistical data. For questions or difficulties regarding these matters please contact our services (see point II.11).

II. DATA COLLECTION

II.1. SCOPE

Intra-Union trade statistics record **the movements of goods (Intra-Union exports / dispatches and Intra-Union imports / arrivals)** between Portugal and the Member States of the European Union, including natural gas.

For almost all operations (except for some specific movements), the goods must physically move between the Member States.

II.2. INTRASTAT SYSTEM (application)

Statistics concerning the trade of goods between EU Member States include Intra-Union exports (dispatches) and Intra-Union imports (arrivals) of goods.

Intra-Union exports (Dispatches) cover goods leaving the Member State of export for a destination in another Member State, as follows:

- a) Union goods, except goods which are in transit between Member States.
- b) Non-Union goods placed in Portugal of export under the inward processing customs procedure.

Remark:

Goods from countries or territories that do not belong to the Community customs territory, in direct transit or having stopped in Portugal, being subject to formalities to allow them to circulate freely **(Import SAD emission)**, and <u>therefore becoming community goods</u>, and subsequently moving to another Member State **should be declared to INTRASTAT as** an **Intra-Union export** (**dispatch**), stating the Member State to which the goods have been sent as the country of destination.

The goods (produced in Portugal) moved to another Member State shall be declared as a consignment to INTRASTAT when they leave Portugal, even if in that Member State they are intended to comply with formalities (**Export SAD emission**) for exports outside the customs territory of the European Union.

Intra-Union imports (Arrivals) cover the goods entering the Member State of arrival, which were initially exported from another Member State, as follows:

a) Union Goods (except goods which are in transit between Member States – entering and leaving a Member State with the exclusive purpose of reaching a Third Member State);

b) Non-Union goods formerly placed in the Member State of export under the inward processing customs procedure, which are maintained under the inward processing customs procedure, or which are released for free circulation in the Member State of import.

Remark: An INTRASTAT declaration of Intra-Union import (arrival) shall be filled in for all the goods coming from another Member State, as soon as they arrive in Portugal, even if they are meant to be exported (dispatched) later, after undergoing export formalities **(Export SAD emission)**, towards outside the EU statistical territory.

In practical terms, INTRASTAT should record the physical movement of goods between the statistical territories of Member States, therefore <u>an INTRASTAT declaration shall be submitted</u> for all moveable goods entering (**Intra-Union imports/arrivals**) and/or leaving a Member State (**Intra-Union exports/dispatches**):

- Commercial transactions of goods that change ownership and are intended for use in consumption, investment or resale, including tangible fixed assets and natural gas (in the case of distribution system operators and suppliers);
- 2. Movements of goods from one Member State to another Member State without transfer of ownership (for example: stock transfers, movement of goods before and after being transformed);
- 3. Returned goods;
- 4. Some specific movements of goods (vessels, aircraft,...).

Important remark: Mind the fact that the movements concerning **the purchase/sale of natural gas to the EU should be declared, on a monthly basis, under the scope of the INTRASTAT System for distribution system operators and suppliers** (if you have any questions, please contact our service).

The information to be declared in Intrastat regarding additional units (TJ) must correspond to the intracommunity nominations requested from REN.

II.3. EXCLUSIONS

Some community goods that circulate between Member States shall not be declared for Intra-Union trade statistics (see **ANNEX VII**).

For example, an INTRASTAT declaration is not needed for:

- Electricity these transactions are estimated based on data from the Grid operator "Redes Energéticas Nacionais" (REN) and the "Operador de Mercado Ibérico de Energia" (OMIE);
- 2. Transactions of services exclusively (i.e. do not imply physical movement of goods);
 - > Technical displacement for repair purposes;
 - Consulting services,...
- 3. Goods supplied free of charge, which are themselves not the subject of a commercial transaction, provided that the movement is with the sole intention of preparing or supporting an intended subsequent trade transaction, by demonstrating the characteristics of goods or services such as:
 - > advertising material (brochures, leaflets, pins, pens);
 - > commercial samples (goods used to illustrate their function);
- Repairs (repair of a good implies that it regains its original function or condition without changing its nature);
- 5. Software and licences downloaded from the Internet and/or transmitted via the internet;
- 6. Transactions without movement of goods in Portugal (example: the case of "triangular trade", that involves an intermediary in Portugal, where there is only invoicing in Portugal without physical movement of the goods).

Triangular trade in the scope of INTRASTAT occurs when three subjects are involved in an Intra-Union trade transaction. The most common case occurs when a company in **Member State A** sells goods to a company in **Member State B**, which in turn sells it to a company in **Member State C**, although the goods are physically moved only once - from A to C.

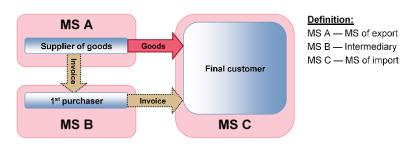

Figure 1 - Example of a triangular trade

Taking into account that the statistics resulting from INTRASTAT declared information are based on the recording of physical flows of goods, enterprises A and C must declare a movement of goods in their respective country. The enterprise of Country B should not declare this business transaction since there was no physical movement of goods in this country. (See examples in the FAQ).

II.4. PROVIDERS OF STATISTICAL INFORMATION (PSIs)

The parties responsible for providing information for the INTRASTAT System shall be:

- 1. The natural or legal person registered for VAT in the Member State of Intra-Union export (dispatch) who:
 - a. Has concluded the contract, with the exception of transport contracts, giving rise to the export (dispatch) of goods or, failing that,
 - b. Exports (dispatches) or provides for the export (dispatch) of the goods or, failing that,
 - c. is in possession of the goods which are the subject of the export (dispatch).
- 2. The natural or legal person registered for VAT in the Member State of Intra-Union import (arrival) who:
 - a. has concluded the contract, with the exception of transport contracts, giving rise to the delivery of goods or, failing that,
 - b. takes delivery or provides for delivery of the goods or, failing that,
 - c. is in possession of the goods which are the subject of the delivery.
- 3. Failure by any party responsible for providing information render him/her liable to the penalties which the Member States shall lay down.

Any relevant change that might affect the relation between Statistics Portugal and an enterprise (change of VAT number, social designation, address, contact information, any new or excluded third declaring parties) should be reported to Statistics Portugal as soon as possible through an *update on WebInq or by an email message using the address* <u>intrastat@ine.pt</u> (for the PSIs of the Mainland/Azores) or <u>drem.intrastat@ine.pt</u> (for the PSIs of the Madeira).

II.5. THIRD PARTY DECLARANTS

The parties responsible for providing information PSI (Main user of the WebInq Application) may transfer the task to a <u>third party</u> (Secondary user of the WebInq Application), but such transfer shall in no way reduce the responsibility of the said party.

II.6. STATISTICAL THRESHOLDS

Statistics Portugal establishes, on a yearly basis, the statistical thresholds, for each flow; these thresholds determine the obligations that the parties responsible for providing statistical information are subject to. Those statistical thresholds are valid for the whole civil year.

For 2024, the exemption thresholds and statistical value thresholds were separately set for arrivals and dispatches:

II.6.1. EXEMPTION THRESHOLD

Determines the value from which the PSI has the obligation to declare Intra-Union transactions to INTRASTAT.

During the year 2024, traders that fall under this obligation are those who:

- by the time of the sample selection (values until October 2023), have carried out, in the last 12 available months, purchases of goods (Intra-Union imports/arrivals) and/or sales (Intra-Union exports/dispatches) equal or above EUR 600 000, in terms of aggregated value in the mentioned period;
- after the date of the sample selection, in the year 2023, made purchases of goods (Intra-Union imports/arrivals) and/or sales (Intra-Union exports/ dispatches) equal or above EUR 600 000, in terms of aggregated value in the mentioned period;
- will make, in 2024, purchases of goods (Intra-Union imports/arrivals) and/or sales (Intra-Union exports/ dispatches) equal or above EUR 600 000, in terms of aggregated value in the mentioned period. For traders that reach the exemption thresholds during 2024, Statistics Portugal requires the corresponding INTRASTAT declaration to be submitted from the very first transactions of the year.

Remark:

The submission of a **null INTRASTAT declaration** is mandatory for the months in which it is verified that there are no transactions.

For Intra-Union traders based in the <u>Autonomous Region of Madeira</u>, <u>the applicable</u> <u>exemption threshold is set at EUR 25 000</u>, for acquisition of goods (Intra-Union imports /arrivals) and/or sales (Intra-Union exports/dispatches).

II.6.2. STATISTICAL VALUE THRESHOLD

It sets the value from which those responsible for providing information are obliged to register, not only the taxable amount but, also the statistical value.

The values of statistical thresholds for the Intra-Union trade in 2024 will be as follows (in euro):

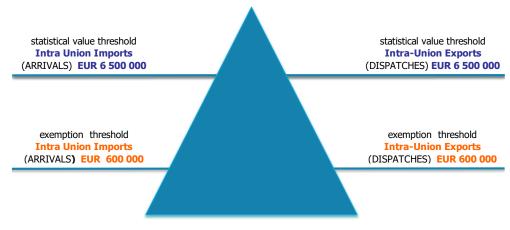

Figure 2 - Statistical thresholds for Intra-EU trade in 2024

II.7. COLLECTION FORMATS

SUPPORT INFORMATION									
ELECTRONIC WEB FORMS	identification and characterization of the	https://webinq.ine.pt/private/login or phone nº 218426307 (every weekday from 9:00 to 5:00PM) or 201145126							
PAPER FORM	Arrivals/Dispatches - INTRASTAT form	Annex IX							

Figure 3 - Information support declared in Intrastat

As far as statistical obligation is concerned, **the reference period for the information to be collected shall be the calendar month of the dispatch or arrival of goods**, i.e.:

- on Intra-Union imports (**Arrivals**), goods should be declared **in the month they were received by the enterprise**.

- In Intra-Union exports (**Dispatches**), goods should be declared in the month they left the enterprise.

II.8. DATA TRANSMISSION

The PSIs have to transmit data on **a monthly basis**, for **each flow**, **through a single declaration** - INTRASTAT declaration –, which includes all the transactions carried out within the **reference period** (month).

Remark: When a paper form is used, PSIs must keep, <u>during a 2-year period</u>, a copy of the monthly declarations sent to Statistics Portugal.

As far as Webing electronic declaration is concerned, this procedure is not required, as Webing allows for the storage and later recovery of the declarations sent to Statistics Portugal.

II.9. DATA TRANSMISSION DEADLINE

The PSIs have to send data regarding each civil month and each flow. The **<u>deadline for submission is</u>** <u>the 15th of the month following the reference month.</u>

II.10.PENALTIES AND SANCTIONS

<u>IMPLEMENTING REGULATION (UE) nº 2020/1197</u>, of July 30, of the Commission, states (in chapter I section 8 no. 2) that "*Failure by any reporting unit for providing the information to fulfil their obligations under this Regulation shall render the reporting unit liable to any penalties which the Member States lay down"*.

Therefore, according to Portuguese law <u>Nº 22/2008</u>, of May 13 (Article no. 26) - The National Statistical System Law -, where there are information reporting requirements, each of the following types of behaviour shall be considered a serious breach of regulations:

- Failing to answer the INTRASTAT (surveys) within the deadline set by the statistical authority;
- The repeated inaccurate and insufficient answer to INTRASTAT (the surveys) (as in the case of false Null INTRASTAT declarations - without due validation by the PSI or the partial sending of the data);
- Refusal to provide data to the statistical authorities;
- A misleading answer that leads to error;
- Providing data in ways other than those required by law or defined by the Regulations.

The breaches of regulations envisaged in paragraph 2 of Article no. 26 shall be subject to a fine from

EUR 250 to EUR 25,000 for individuals or EUR 500 to EUR 50,000 for enterprises.

II.11.INFORMATION ON INTRASTAT

PSIs should send INTRASTAT to Statistics Portugal on a monthly basis. There are two main **<u>data</u>** <u>**Collection Centres**</u>, which you may contact for more information:

COLLECTION CENTRES							
MAINLAND AND AZORES	MADEIRA						
INSTITUTO NA CIONA L DE ESTA TÍSTICA -	DIREÇÃO REGIONAL DE ESTATÍSTICA DA						
DELEGAÇÃO DO PORTO - DRGD	MADEIRA						
Edifício Scala - Rua do Vilar, 235 - 9º	Calçada de Santa Clara, 38 1º						
4050 – 626 PORTO	9004 – 545 FUNCHAL						
TEL: 226 072 080	TEL: 291 145 126						
E-MAIL: <u>intrastat@ine.pt</u>	E-MAIL: <u>drem.intrastat@ine.pt</u>						
Traders based in the Mainland and in the Azores	Traders based in Madeira						

Figure 4 - Contacts for collection centers

II.12.CORRECTIONS OF STATISTICAL DATA

PSIs are responsible for the accuracy of data, even if such obligation has been transferred to a third party. Therefore, whenever correcting statistical information is necessary, economic operators and/or the third-party reporting should immediately inform the data **collection centres**.

All corrections should be reported to Statistics Portugal as follows:

- **WebInq** users – must access the declaration previously submitted, through the option "**Entregas**", search for the form "INTRA-CH or INTRA-EX" and choose the period (month) that you wish to change by clicking the icon "**Corrigir entrega**". All the previous lines are automatically recovered and **allow to proceed with all the necessary changes**: by editing, adding or erasing the required lines and then click once more in the option "responder" (see point I.6).

II.13. NULL TRANSACTIONS

PSIs should submit a Null INTRASTAT declaration for the months in which they did not carry out trade transactions:

WebInq users: should submit a declaration of type "*Entregar uma Declaração de Ausência*" (see point I.4.2).

Remark: The submission of a Null INTRASTAT declaration is mandatory, therefore failing to do so implies the application of sanctions for non-compliance with the statistical obligations within the scope of the INTRASTAT System (see paragraph II.10). The same is applied to every false Null declaration.

II.14. LEGISLATION

- Law nº 22/2008, of 13 May, on the National Statistical System (D.R. No 92, I Série).
- Decree-Law <u>Nº 136/2012</u> of 02 July, which approves the the organic law of of Statistics Portugal (D.R. No. 126, Series I).
- Ordinance nº 423/2012, of December 28, approving the statutes of Statistics Portugal that define their internal organization (D.R. No. 251, Series I).
- <u>Decree-law nº 126-A/2011</u>Organic Law of the Presidency of the Council of Ministers: Establishes the organizational structure of the Presidency of the Council of Ministers.
- <u>Commission Regulation nº 92/C 349/01</u> (92/C 349/01) Explanatory note to the INTRASTAT form referred to in article 2 of.
- <u>European Council Decision</u>, of 11 July 2012 amending the status of Mayotte with regard to the European Union
- Council Regulation (EC) No 2866/98, of 31 December 1998, <u>current consolidated version</u>, of 1 January 2023, on the conversion rates between the euro and the currencies of the Member States adopting the euro.
- Commission Implementing Regulation (EU) 2015/2447 of 24 November 2015, <u>current</u> <u>consolidated version</u>, of 20 December 2022, laying down detailed rules for implementing certain provisions of Regulation (EU) No 952/2013 of the European Parliament and of the Council laying down the Union Customs Code.
- Regulation (EU) 2019/2152 Of The European Parliament And Of The CounciL of 27 November 2019, of 1 January 2022, *current consolidated version*, 1 January 2022, *on European business statistics, repealing 10 legal acts in the field of business statistics.*
- Commission Implementing Regulation (EU) 2020/1197 Of 30 July 2020, <u>current</u> <u>consolidated version</u>, of 1 January 2022, laying down technical specifications and arrangements pursuant to Regulation (EU) 2019/2152 of the European Parliament and of the Council on European business statistics repealing 10 legal acts in the field of business statistics.
- <u>Commission Regulation (EU) 2020/1470</u>, of 12 October *2020* on the nomenclature of countries and territories for the European statistics on international trade in goods and on the geographical breakdown for other business statistics.
- <u>Commission Implementing Regulation (EU) 2021/1225</u> of **27 July 2021** specifying the arrangements for the data exchanges pursuant to Regulation (EU) 2019/2152 of the European Parliament and of the Council and amending Commission Implementing Regulation (EU) 2020/1197, as regards the Member State of extra-Union export and the obligations of reporting units
- Commission Delegated Regulation (EU) 2021/1704 of 14 July 2021, <u>current consolidated</u> <u>version</u>, 24 September 2021, supplementing Regulation (EU) 2019/2152 of the European Parliament and of the Council by further specifying the details for the statistical information to be provided by tax and customs authorities and amending its Annexes V and VI.

- <u>Commission Delegated Regulation (EU) 2023/674</u> of 26 December 2022 amending the Annexes to Regulation (EC) No 1059/2003 of the European Parliament and of the Council on the establishment of a common classification of territorial units for statistics (NUTS).
- <u>Commission Implementing Regulation (EU) 2023/2364</u> of 26 September 2023 amending Annex I to Council Regulation (EEC) No 2658/87 on the tariff and statistical nomenclature and on the Common Customs Tariff.

III. DATA SUBMISSION

III.1. GENERAL RULES

III.1.1. COMMODITY CODES

The goods being the subject of the movement must be identified. For this, an eight digit, or nine digit (**some codes of chapter 22 and of chapter 39**), INTRASTAT nomenclature code must be used, corresponding to the sub division where the goods belong in the current version of the <u>Combined</u> <u>Nomenclature</u> (2024 version available in <u>DOWNLOADS INTRASTAT</u> or for consulting in <u>CONSULTA</u> <u>NOMENCLATURA</u>).

III.1.2. PARTNER MEMBER STATE

Member State of Consignment - only on Intra-Union import (arrival) - must be an EU Member State)

The partner Member State is the Member State of consignment, on Intra-Union import (arrival), which reflects the Member State of dispatch in cases where goods enter directly from another Member State.

Before reaching the Member State of arrival, whenever goods have entered one or more Member States in transit and have been subject in those States to halts or legal operations not inherent in their transport (e.g. change of ownership), the Member State of consignment shall be taken as the last Member State where such halts or operations occurred.

Member State of Destination - only on Intra-Union export (dispatch) - must be an EU Member State

Is the Member State to which goods are exported by the reporting Member State, without — as far as it is known at the time of export — being subject to any halts or legal operations in an intermediate Member State or non-member country which are not inherent in their transport.

Indicate the code of the Member State of consignment and of destination (2 alphabetic characters) in accordance with the Table of Countries in <u>ANNEX I A</u>.

III.1.3. COUNTRY OF ORIGIN (both flows)

Is the country from which the goods originate.

Goods wholly obtained or produced in a country are considered as originating in that country.

A good, in the production of which more than one country are involved, is considered to originate in the country where they underwent their last, substantial, economically justified processing or manufacturing operation carried out in a company equipped for that purpose, resulting in the manufacture of a new product or representing an important stage of manufacture. The origin of the goods can only be changed by processing or manufacture; any other operation (for example, purchase/sale, return of goods, etc.) does not change its origin.

Enter the code of the country of origin (2 alphabetic characters) according to the Table of Countries in <u>ANNEX I B</u>.

III.1.4. REGION (Optional)

Enter the code of the **Portuguese region** according to NUTS III - Nomenclature of territorial units for statistics (2 digits) as specified in <u>ANNEX II</u>.

> Region of destination – only on Arrival

The "*region of destination*", on arrival, means the region of the Member State of arrival where the goods are to be consumed or erected, assembled, processed, repaired or maintained; failing that, the region of destination is the region to which the goods are to be dispatched, or, failing that, the region where the commercial process is to take place.

Region of origin – only on Dispatch

The "*region of origin*", on dispatch, means the region of the Member State of dispatch where the goods were produced or were erected, assembled, processed, repaired or maintained; failing that, the region of origin is the region where the goods were dispatched, or, failing that, the region where the commercial process took place.

The table of regions was updated **as a result of the adoption of the new configuration of the Nomenclature of Territorial Units**, in accordance with the Commission Delegated Regulation (EC) No 2023/674, of 26 December 2022, amending the annexes to Regulation (EC) No 1059/2003, of the European Parliament and of the Council, on the establishment of a common classification of territorial units for statistics (NUTS).

III.1.5. DELIVERY TERMS

The "delivery terms" mean those provisions of the sales contract which lay down the obligations of the seller and the buyer respectively, in accordance with the Incoterms of the International Chamber of Commerce (CIF, FOB, etc.). The main advantage of their use is that they are the common language of transactions.

Enter the "Incoterm" code from the International Chamber of Commerce (three-digit letter code), as specified in the Delivery Conditions table of <u>ANNEX III</u>.

III.1.6. NATURE OF TRANSACTION

The nature of transaction means the different features (purchase/sale, work under contract, etc.) which are deemed to be useful in distinguishing one transaction from another, in particular for the purposes of Balance of Payments and National Accounts.

Enter the appropriate code (2 digits) from the Nature of Transaction (NoT) Table in ANNEX IV;

Very important remark: under the changes already mentioned, we call for your utmost attention to the use of the correct nature of transaction code (for any doubts, the Nature of Transaction Codes manual is available for consultation or you can contact our services through intrastat@ine.pt).

Important remark: For returns and replacements, the NoT 2* code (21, 22, 23) should be used only when the original movement of the goods was recorded with NoT 1*, 3* or 7*. The value of the returned or replaced goods should be the value of the original sale or purchase of the goods.

Returns of goods whose original transaction was declared with NoT codes 8 and 9 must be declared again with the same transaction codes (i.e., 8 and 9). Returns of goods with NoT codes 41 and 42 must be declared with codes 51 and 52.

III.1.7. MODE OF TRANSPORT

> On Intra-Union import (Arrival)

The mode of transport (1 digit) is determined by the active means of transport by which the goods are presumed to have entered the *statistical territory of the Member State of arrival (Portugal)*.

> On Intra-Union export (Dispatch)

The mode of transport (1 digit) is determined by the active means of transport by which the goods are presumed to leave the *statistical territory of the Member State of dispatch (Portugal)*.

For coding purposes, the Mode of Transport table should be used as in ANNEX V.

III.1.8. PORT/AIRPORT

> Port or airport of unload - only on Intra-Union import (Arrival)

This box is to be filled only in the cases of sea and air transport modes.

Enter the code of the port or airport of unload (three-digit letter code) corresponding to the active mode of transport referred in box 13 of the INTRASTAT declaration, by using the nomenclature of Ports or Airports as specified in <u>ANNEX VI</u>.

The "port or airport of unload" is the port or airport, located in the Portuguese territory, in which the goods are unloaded from the active means of transport in which the goods have presumably entered in Portugal.

> Port or airport of load – <u>only on Intra-Union export (Dispatch)</u>

This box should only be filled in the cases of sea and air transport modes.

Write the code of the port or airport of load (three-digit letter code) corresponding to the active mode of transport as stated in box 13 of the INTRASTAT declaration, using the table of ports and airports in <u>ANNEX VI</u>.

The "port or airport of load" is the port or airport, located in Portuguese territory, where goods are loaded in the active means of transport presumably used to carry goods out of Portugal.

III.1.9. NET MASS

Enter, for each aggregation, the net mass (net weight) of the goods excluding all packaging, written in kilograms down to the gram (three decimal places). *For example, the indication 125 grams of gold* (0.125) or 125 kg (125.000).

For some Combined Nomenclature codes, declaration of "net mass" is optional.

CODE	LABEL					
27160000	Electrical energy					
89011010	Sea-going cruise ships, excursion boats and similar vessels principally designed for the transport of persons, and seagoing ferry-boats of all kinds					
89012010 Sea-going tankers						
89013010	Sea-going refrigerated vessels (excl. tankers)					
89019010	Sea-going vessels for the transport of goods and seagoing vessels for the transport of both persons and goods (excl. refrigerated vessels, tankers, ferry-boats and vessels principally designed for the transport of persons)					
89020010	Fishing vessels, factory ships and other vessels for processing or preserving fishery products, seagoing					
89032210	Sailboats, with or without auxiliary motor, of a length > 7,5 m but <= 24 m, seagoing (excl. inflatable)					
89032310	Sailboats, with or without auxiliary motor, of a length > 24 m, seagoing					
89033210	Motorboats, of a length > 7,5 m but <= 24 m, for pleasure or sports, seagoing (excl. inflatable and outboard)					
89033310	Motorboats, of a length > 24 m, for pleasure or sports, seagoing (excl. outboard)					
89040010	Tugs, seagoing and for inland waterways					
89040091	Sea-going pusher craft					
89051010	Sea-going dredgers					
89052000	Floating or submersible drilling or production platforms					
89059010	Sea-going light vessels, fire-floats, floating cranes and other vessels, the navigability of which is subsidiary to their main function (excl. dredgers, floating or submersible drilling or production platforms; fishing vessels and warships)					
89061000	Warships of all kinds					
89069010	Sea-going vessels, incl. lifeboats (excl. warships, rowing boats and other vessels of heading 8901 to 8905 and vessels for breaking up)					

Please note that, when using WebInq, this field accepts both a comma and a dot, as decimal separators, and for that reason these characters can <u>never be used as a</u> <u>thousand separator</u>.

III.1.10. SUPLEMENTARY UNITS

For each aggregation, enter the quantity of commodities expressed in the foreseen unit, whenever required by the Combined Nomenclature (for example: m, m², m³, units, etc.).

Supplementary units are expressed in exact units, rounding off numbers:

- for the unit immediately above when the termination of the fraction is equal to or greater than 0.500;
- For the unit immediately below when the termination of the fraction is less than 0.500.

III.1.11. TAXABLE AMOUNT

The declaration of the taxable amount is mandatory for all transactions.

Therefore, it should be filled, for <u>each aggregation</u>, the taxable amount of the goods, in **exact Euro**, after rounding off numbers.

On Intra-Union import (Arrival) and on Intra-Union export (Dispatch), the taxable amount is the value used to be determined for taxation purposes for trade which is declared for VAT (2006/112/EC Directive <u>current consolidated version</u>, 1 July 2022), subtracting, however, any excise duties, for goods submitted to those taxes (example: tobacco, beverages,...).

Whenever the taxable amount does not have to be established for taxation purposes, its equivalent must correspond to the invoice value, excluding VAT, or failing this, to an amount which would have been invoiced in the event of any sale or purchase.

The invoice value may include incidental expenses if they represent payments made by the buyer to the seller and are simultaneously incorporated into the base for VAT. The incidental expenses may be the expenses related to packaging, transport, insurance or commissions.

As regards the <u>inward economic processing under contract</u> (see example in FAQ), the taxable amount corresponds, on Intra-Union import (Arrival) and on Intra-Union export (Dispatch), to the value that would have been invoiced in the event of any purchase or sale.

III.1.12. STATISTICAL VALUE

The declaration of the Statistical Value is only mandatory for enterprises reporting annual intra-Union transactions of EUR 6.5 million and above, on Intra-Union import (Arrival) and on Intra-Union export (Dispatch), taking as reference the last twelve months available.

According to the economic flow (Arrival or Dispatch) and the Delivery Terms, the statistical value of the commodities should be expressed in **exact Euro**, for <u>each aggregation/transaction</u>.

On Intra-Union import (<u>Arrival</u>), statistical value shall be established from the taxable amount and shall include transport and insurance costs relating to the part of the journey outside the statistical territory up to the border of the Member State of arrival (Portugal) (<u>ANNEX XI</u>)

- On Intra-Union export (Dispatch), statistical value shall be established from the taxable amount and shall include transport and insurance costs relating to the part of the journey that is located in the statistical territory from the delivery point to the border of the Member State of dispatch (Portugal) (<u>ANNEX XI</u>).
- For goods resulting from inward economic processing under contract, the statistical value will be defined in dispatch and on arrival, as if the goods were entirely produced in the Member State where the transformation took place.

For applying exchange rates, should be used those listed in <u>chapter III, Section I, paragraphs 8</u> and 9 of art. 16th of Decree-Law No. 102/2008, of 20 June:

"Art. 16th"

- 8 When the elements necessary to determine the taxable amount are expressed in a currency other than the national currency, the exchange rate to be used is the last one disclosed by the European Central Bank or that of sale practiced by any bank established in the national territory.
- 9 For the purposes foreseen in the previous number, the taxable persons may also choose between considering the rate of the day on which the tax was due or the 1st working day of the respective month.

III.1.13. PARTNER ID (only on Intra-Union exports (dispatches))

The Partner ID is the VAT identification number (VIN) of the taxable persons or non-taxable legal persons who effectively receives the goods (**principle of the physical movement of goods underlying the INTRASTAT system**).

The Partner ID must include the acronym of the COUNTRY to which the acquirer belongs (2 alphabetic characters) followed by the acquirer VAT identification number, according to the corresponding national specifications.

Note that the structure of the Partner ID VAT number is the same as the one used in the recapitulative statement. In most cases, the prefix of the country included is the same as the one used in the classification of the destination country of the goods (except for Greece where "EL" is used and for Northern Ireland that corresponds to "XI").

This number can be validated at: <u>https://ec.europa.eu/taxation_customs/vies/#/vat-validation</u>

With the exchange of micro-data between Member States (MS), the correct identification of the Partner ID is crucial to allow for a future simplification in the reporting of Intra-Union import data (arrivals) by

enterprises, allowing MS to use the Intra-Union export information (dispatches) of the country of origin in the compilation of their Intra-Union imports (arrivals).

The Partner ID variable, collected on Intra-Union exports (dispatches), will allow comparison at the micro level with Intra-Union import data (arrivals) from partner countries. Only in cases where there is a correct identification of the Partner ID, the use of the information (from mirror statistics) will be possible in the compilation of the corresponding Intra-Union imports (arrivals).

Rule to apply when entering the Partner ID:

The Partner ID, in exports, should correspond to the entity <u>who effectively received</u> the goods (**physical movement**) after dispatch from Portugal.

In very exceptional cases, when it is not at all possible to make this identification, it may be indicated:

1st The Partner ID corresponding to the entity to whom the goods were invoiced;

2nd A dummy Partner ID, indicating the invoicing country of the goods, followed, twelve times, by the number 9 (e.g. "FR999999999999");

3rd If neither of the two previous options are possible, fill in the Partner ID with "QV999999999999".

The collaboration of all enterprises is therefore requested to improve the quality of the information to be made available within the scope of the INTRASTAT, so that it is possible to make the necessary simplifications that allow for a reduction in the statistical burden on respondents.

Statistics Portugal is grateful for the collaboration and wishes to underline that the quality and relevance of the International Trade in Goods Statistics depends on the accuracy and timeliness of the individual data provided by the enterprises.

IV.4. ANNEX III - TABLE OF DELIVERY TERMS (INCOTERMS 2010 - CCI / Incoterms®)

INCOTERM CODE	MINING	TRANSPORT	DESCRIPTION (INCOTERMS 2010/2020)
EXW	ExWorks	All (factory location)	The seller delivers when it places the goods at the disposal of the buyer at the seller's premises or at another named place (i.e.,works, factory, warehouse, etc.). The seller does not need to load the goods on any collecting vehicle, nor does it need to clear the goods for export, where such clearance is applicable
FCA	Free Carrier	All (place agreed)	The seller delivers the goods to the carrier or another person nominated by the buyer at the seller's premises or another named place. The parties are well advised to specify as clearly as possible the point within the named place of delivery, as the risk passes to the buyer at that point
FAS	Free Alongside Ship	Sea (port of embarkation agreed)	The seller delivers when the goods are placed alongside the vessel (e.g., on a quay or a barge) nominated by the buyer at the named port of shipment. The risk of loss of or damage to the goods passes when the goods are alongside the ship, and the buyer bears all costs from that moment onwards
FOB	Free on Board	Sea (port of embarkation agreed)	The seller delivers the goods on board the vessel nominated by the buyer at the named port of shipment or procures the goods already so delivered. The risk of loss of or damage to the goods passes when the goods are on board the vessel, and the buyer bears all costs from that moment onwards.
CFR	Costs and Freights	Maritime (port of destination agreed	The seller delivers the goods on board the vessel or procures the goods already so delivered. The risk of loss of or damage to the goods passes when the goods are on board the vessel. the seller must contract for and pay the costs and freight necessary to bring the goods to the named port of destination
СРТ	Carriage Paid To	All (place of destination agreed)	The seller delivers the goods to the carrier or another person nominated by the seller at an agreed place (if any such place is agreed between parties) and that the seller must contract for and pay the costs of carriage necessary to bring the goods to the named place of destination.
CIF	Costs, Insurance and Freight		The seller delivers the goods on board the vessel or procures the goods already so delivered. The risk of loss of or damage to the goods passes when the goods are on board the vessel. The seller must contract for and pay the costs and freight necessary to bring the goods to the named port of destination
СІР	Carriage and Insurance Paid To	All (place of destination agreed)	The seller delivers the goods to the carrier or another person nominated by the seller at an agreed place (if any such place is agreed between parties) and that the seller must contract for and pay the costs of carriage necessary to bring the goods to the named place of destination.
DAT	Delivered at Terminal	All (place of destination in the country of arrival)	The seller delivers when the goods, once unloaded from the arriving means of transport, are placed at the disposal of the buyer at a named terminal at the named port or place of destination. "Terminal" includes a place, whether covered or not, such as a quay, warehouse, container yard or road, rail or air cargo terminal. The seller bears all risks involved in bringing the goods to and unloading them at the terminal at the named port or place of destination.
DAP	Delivered at Place	All (place of destination in the country of arrival)	The seller delivers when the goods are placed at the disposal of the buyer on the arriving means of transport ready for unloading at the named place of destination. The seller bears all risks involved in bringing the goods to the named place.
DPU	Delivered at Place Unloaded	All (place of destination in the country of arrival)	The seller delivers the good -and transfers risk - to the buyer when the goods, once unloaded from the arriving means of transport, are places at the disposal of the buyer at a named place of destination. The seller bears al risks involved in bringing the goods to and unloading them at the named place of destination.
DDP	Delivered Duty Paid	All (place of delivery agreed in the country of arrival)	The seller delivers the goods when the goods are placed at the disposal of the buyer, cleared for import on the arriving means of transport ready for unloading at the named place of destination. The seller bears all the costs and risks involved in bringing the goods to the place of destination and has an obligation to clear the goods not only for export but also for import, to pay any duty for both export and import and to carry out all customs formalities.
ххх	Delivery conditions other than those mentioned	All (exact description of the conditions indicated in the contract)	This acronym should only be used when the transaction can not be included in any of the delivery conditions mentioned

IV.5. ANNEX III - TABLE OF DELIVERY TERMS (INCOTERMS - ICC/ Incoterms®) (cont.)

IV.9. ANNEX VII - LIST OF EXCLUSIONS

(a) monetary gold;

(b) means of payment which are legal tender and securities, including means which are payments for services such as postage, taxes, user fees;

(c) goods for or following temporary use (e.g. hire, loan, operational leasing), provided <u>all the following</u> <u>conditions are met</u>:

- No processing is or was planned or carried out,
- the expected duration of the temporary use was or is not intended to be longer than 24 months,
- the dispatch/arrival has not to be declared as an intra-Union supply/acquisition for VAT purposes or no change of ownership took place or is intended to take place for extra-Union export/import; (d) goods moving between;

(d) goods moving between:

- a Member State and its territorial enclaves in other Member States or non-member countries,
- the host Member State and territorial enclaves of other Member States, non-member countries or international organisations.

Territorial enclaves include embassies, consulates, military bases and scientific bases outside the territory of the mother country;

(e) goods used as carriers of customized information, including software;

(f) software downloaded from the Internet;

(g) goods supplied free of charge which are themselves not the subject of a commercial transaction, provided that the movement is with the sole intention of preparing or supporting an intended subsequent trade transaction by demonstrating the characteristics of goods or services such as:

- advertising material,
- commercial samples;

(h) goods for and after repair or maintenance and replacement parts that are incorporated in the framework of the repair or maintenance and replaced defective parts;

(i) means of transport travelling in the course of their work, including spacecraft launchers at the time of launching;

(j) periodicals under subscription;

(I) Personal property belonging to natural persons transferring their normal place of residence; trousseaux and household effects belonging to a person transferring his or her normal place of residence on the occasion of his or her marriage; personal property acquired by inheritance; school outfits, educational materials and related household effects; coffins containing bodies, funerary urns containing the ashes of deceased persons, and ornamental funerary articles transported with the coffins and urns; goods for charitable or philanthropic organisations and goods for the benefit of disaster victims.

File structure in CSV format

The Upload of a file for the fulfilment of an INTRASTAT form is a facility which allows the automatic inclusion of the transactions/additions. Once loaded, the additions follow the validation and submission processes common to the regular webform available in WebInq for the INTRASTAT.

Attention: the first line must be header.

Order	Field Name	Size	Description
1	FLUXO	8	INTRA-CH or INTRA-EX according to the flow of transactions (arrivals or dispatches)
2	PERIODO	6	The reference period for Community goods: year and month (YYYYMM)
3	NIF	9	Legal Vat Number (same as VAT number)
4	REF	Má x 30	Internal standard text free used by the respondent (do not use ';' in the content not to be interpreted as a field separator)
5	NC	8 ou 9	The commodity code (CN) ans may be 8 or 9 digits
6	PAIS	2	The Partner Member State code
7	PORIGEM	2	The Country of Origin (applicable to Arrivals and Dispatches) code
8	REGIAO	2	The code for the Region of Destination (Arrivals) or Origin (Dispatches)
9	CODENT	3	The Delivery Terms (Incoterm) code
10	NATTRA	2	The Nature of Transaction Code
11	MODTRA	1	The Mode of transport code
12	AERPOR	3	The Port / Airport (where applicable) code
13	MASSA	9 + 3	The Net Mass (net weight in Kg). If necessary, it can spedify up to 3 decimal places. The decimal separator is allowed to ',' (comma). (Ex: 999999999.999)
14	UNSUP	10	The Supplementary Unit (if applicable) (integer value in the appropriate unit of measurement)
15	VALFAC	9	The taxable amount (integer) addition
16	VALEST	9	The Statistica Value (integer) addition, if the PSI are above the Statiscal Value Threshold
17	ADQNIF	Máx. 17	PARTNER ID (VAT Identification Number (VIN) of the receiving trader which should be composed of the 2-alphabetic character codes for the list of 28 EU MSs according to the GEONOMENCLATURE) (Only dispatches)*

There are a number of rules to follow:

- The file to be uploaded must have the CSV text format; field separator to be used is ";" (semicolon). If it is necessary to introduce any field without content (for example: SUPLEMENTARY UNITS), you must introduce two ";" one after the other. At the end of line it is necessary to use the ";"
- This type of file may be created/edited in a **worksheet** (Microsoft Excel or similar); the first line of file has to have the name of fields and these have to appear according to the <u>order</u> shown at the above table;
- During upload of file a context <u>validation is carried out</u>. The Fluxo, the Período and NIF have to match the form; each file must have only the information of a NIF/período/fluxo;
- ✓ During upload of file a validation of file structure is also done:
 - In the fields corresponding to **codes** (PAIS, PORIGEM, REGIAO, CODENT, NATTRA, MODTRA e AERPOR) there has to be introduced the exact number of characters expected;
 - In the numerical fields (MASSA, UNSUP, VALFAC, VALEST) are not allowed thousand separators. <u>Cell size</u> <u>defined for each field has to be respected</u>.
 - Net Mass is the only field that allows the use of 3 decimal places;
 - In the fields UNSUP, VALFAC e VALEST only whole values are accepted;
- ✓ If it doesn't occur any error on validation of file structure and context, data will be uploaded into form and its content is analyzed according to defined validation rules;
- \checkmark Number of line is given by the file upload e matches file order.

Attention:

If you choose to use a **WORKSHEET** to introduce information, please pay attention that:

- The first line of the file must contain the name of the fields and they must appear in the <u>order</u> indicated in the table;
 It is mandatory to assign the name FLOW to the 1st field;
- The column with the NC code indication must be formatted as TEXT. There are NC codes that start with 0 (zero). In this situation, if the column is not formatted as TEXT, at the time of writing to CSV, these zeros will be lost.

SI-Slovenia	SI99999999	1 block of 8 digits		
SK-Slovakia	SK9999999999	1 block of 10 digits		

Remarks:

*: Format excludes 2 letter alpha prefix

- 9: A digit
- X: A letter or a digit
 S: A letter; a digit; "+" or "*"
 L: A letter (PT)

Notes:

- 1: The 1st position following the prefix is always "U".
- 2: The first digit following the prefix is always zero ('0').
- 3: The (new) 10-digit format is the result of adding a leading zero to the (old) 9-digit format.
- 4: The first and last characters may be alpha or numeric; but they may not both be numeric.
- 5: Identifies branch traders.
- 6: Identifies Government Departments.
- 7: Identifies Health Authorities.
- 8: The ten characters following the prefix is always "B".
- 9: All letters are case sensitive. Please follow the exact syntax of the VAT number shown.
